**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-17, drawn to vertical actuator, classified in class 310, subclass 309.
  - II. Claims 18-26, drawn to a method of making an actuator, classified in class 216, subclass 2.
  - III. Claims 27-28, drawn to an optical phase modulator, classified in class 359, subclass 291.
  - IV. Claims 29-35, drawn to a torsion light controller, classified in class 385, subclass 18.
  - V. Claims 36-38, drawn to an torsion mirror actuator, classified in class 359, subclass 225.
2. Inventions Groups I, III, IV, V and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the products can be made by materially different processes, such as, without a simultaneous etch or a anisotropic etching groove.

Art Unit: 2834

3. Inventions Group I, III, IV, and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility such as an electrical switch actuator, Group III has separate utility as a phase modulator, Group IV has separate utility as a light intensity modulator, and Group V has separate utility as a mirror actuator. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the vertical actuator search required for Group I is not required for Group III, IV, or V; the optical films of Group III is not required for Groups I, IV, or V; the lever supported torsion beam of Group IV is not required for Groups I, III, or V; and the interdigital electrodes surrounding the mirror of Group V is not required of Groups I, III, or IV; therefore the restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2834

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl I.E. Tamai whose telephone number is (571) 272 - 2036.
